- Operating Platform Compatibility: Windows/MacOS
- Highlight: microsoft office vision 2019, ms office 2019

Product Description

Microsoft Office Home and Business 2019 1 PC/Mac Online Activation Key Card

Overview:

Microsoft Office Home and Business 2019 comes with all the classic apps you need to get your work done. It includes the 2019 versions of Word, Excel, PowerPoint and OneNote and Outlook, plus you'll also receive 60 days of Microsoft support. The software can be installed on a PC or Mac device depending on your computer.

This software comes as an activation card which will be delivered to you, allowing you to activate your subscription at your own convenience.

It's compatible with PCs running Windows 10 and later or Mac OS devices.

This is an outright purchase of Home and Business 2019 so you don't have to worry about renewals.

It can be installed on a single PC or Mac.

You will receive the classic 2019 versions of Microsoft Word, Excel, PowerPoint, OneNote and Outlook.

The 2019 version of Excel comes with a variety of new chart types allowing you to display your data in different ways.

With the 2019 version of Outlook you'll be able to use the @ symbol to add contacts into your email or calendar item for a more streamlined experience.

PowerPoint includes a new Zoom option which allows you to deliver non-linear presentations, seamlessly switching between slides.

Requirements

PC	Mac
Microsoft account	Microsoft account
Internet access	Internet access
Windows 10	Intel processor
1.6 GHz, 2-core processor	4 GB RAM
4 GB, 2 GB (32bit) RAM	10 GB available disk space
4 GB available disk space	Mac OS Extended or APFS
1280x 768 screen resolution	1280 x 800 screen resolution

Operating System: Office 2019 for Mac requires macOS Sierra, macOS High Sierra, or later, Windows 10, Windows Server 2019

How Does Office 2019 Compare to Office 2016?

Office 2019 does offer some of the new features incorporated into Office 365 since the release of Office 2016. This includes features like the following:

Improved inking in all the Office apps

A PowerPoint Morph transition that lets you create the appearance of movement between similar slides

Some new chart types in Excel

A Focus Mode in Word that hides onscreen window elements to help minimize distraction.

A Focused Inbox in Outlook that keeps your important messages separate from all the less important ones

Some better integration with the newer Microsoft servers and services (like Teams)

There are some more features we didn't list, but it's not much, honestly. Businesses might be interested in upgrading, especially if they're using some of those services and need better integration. But for home and small business users, there's nothing that compelling there. If you've already got Office 2016 and it's working well for you, there's not much reason to upgrade.

Office is available in the languages listed below. Not all languages are available in all countries/regions.
