Product Description

Product Description:

One of the key highlights of Microsoft Windows Server 2025 Standard is the inclusion of the Windows Admin Center, a powerful and user-friendly management tool that simplifies server administration tasks. With the Windows Admin Center, IT professionals can efficiently manage servers, clusters, hyper-converged infrastructure, and Windows 10 PCs from a single, centralized interface. This intuitive management solution streamlines routine operations, enhances system visibility, and improves overall productivity.

In addition to the Windows Admin Center, Microsoft 2025 Windows Server offers robust features such as Remote Desktop Services (RDS) that enable secure remote access to desktops, applications, and data from virtually anywhere. With RDS, organizations can provide employees with a seamless remote working experience while maintaining data security and compliance. Whether you need to support remote teams, enable BYOD policies, or enhance mobility, Remote Desktop Services in Windows Server 2025 has you covered.

Another essential component of Microsoft Windows Server 2025 Standard is Internet Information Services (IIS), a versatile web server platform that enables hosting, managing, and securing websites and web applications. IIS in Windows Server 2025 provides a scalable and reliable foundation for web hosting, e-commerce, content management, and more. With advanced security features and performance enhancements, IIS empowers organizations to deliver engaging web experiences to their customers and users.

Microsoft 2025 Windows Server also includes Hyper-V Virtualization technology, a feature-rich hypervisor that allows organizations to create and manage virtual machines (VMs) with ease. Hyper-V in Windows Server 2025 enables efficient utilization of hardware resources, enhances workload flexibility, and improves disaster recovery capabilities. Whether you are consolidating servers, testing new software, or deploying cloud services, Hyper-V Virtualization in Windows Server 2025 provides the agility and efficiency you need to succeed.

In conclusion, Microsoft Windows Server 2025 Standard is a comprehensive server solution that combines cutting-edge technology with powerful features to drive business success. From its advanced X86-64 architecture to its intuitive management tools like the Windows Admin Center, this server operating system is designed to meet the demands of modern IT environments. With capabilities such as Remote Desktop Services, Internet Information Services, and Hyper-V Virtualization, Windows Server 2025 empowers organizations to innovate, collaborate, and thrive in today's digital landscape.

Features:

Product Name: Windows Server 2025
License Type: Per Core
Windows Admin Center: Yes
Active Directory Domain Services: Yes
Release Date: 2025
Maximum Physical Memory (RAM) Support: 24 TB

Technical Parameters:

Internet Information Services	Yes
Operating System	Windows
Release Date	2025
Windows Admin Center	Yes
Windows Defender Antivirus	Yes
Maximum Number Of Processors	64
License Type	Per Core
Remote Desktop Services	Yes
Maximum Physical Memory (Ram) Support	24 TB
Version	Server

Applications:

Microsoft Windows Server 2025 Standard, also known as MS Server 2025 STD, is a cutting-edge product designed to revolutionize server operations. With model number P73-08749, this server is proudly made in the USA, ensuring high quality and reliable performance. It is certified with CE, meeting international standards for safety and quality.

Businesses looking to optimize their server infrastructure will find Microsoft Windows Server 2025 Standard to be the perfect solution. Whether you are a small startup or a large enterprise, this server caters to a wide range of application occasions and scenarios.

With a minimum order quantity of 10 units, the pricing is negotiable, making it accessible for businesses of all sizes. The packaging details include OEM and retail options, providing flexibility based on your requirements. Upon payment, the product can be delivered within 48 hours, ensuring quick deployment of your server infrastructure.

Payment terms are convenient, accepting T/T, Western Union, and Paypal, making transactions seamless. With a supply ability of 50,000 pieces per day, rest assured that your business needs will be met promptly.

Microsoft Windows Server 2025 Standard operates on the Windows platform, offering a familiar environment for users. The license type is per core, allowing for scalability and cost-effectiveness based on your usage. With support for a maximum physical memory (RAM) of 24 TB, this server can handle demanding workloads with ease.

One of the standout features of MS Server 2025 STD is its Active Directory Domain Services, enabling efficient management of resources and users within your network. Released in 2025, this server embodies the latest technology and innovations in server management.

Support and Services:

Product Technical Support and Services for Windows Server 2025:
- 24/7 technical support via phone or online chat - Access to a knowledge base with troubleshooting guides and FAQs - Regular software updates and patches to ensure system security and stability - Assistance with installation, configuration, and optimization of Windows Server 2025 - Training resources and documentation for IT administrators and users

FAQ:
