Microsoft designed Windows 7 to make your PC simpler - to be more reliable, more responsive and to makethe things you do every day on your PC easier
Open files and documents in just two clicks.Find virtually anything on your PC just by typing a word or two.
Home Group makes it easy to create a home network and share all of your favorite photos, videos, and music.
Enjoy the music, videos, photos and recorded TV stored on your home PC while travelling. All editions of Windows XP and Windows Vista qualify you to upgrade.
Everything you need for work and home With Windows 7 Professional, you'll be able to run many Windows XP productivity programs in Windows XP mode and recover your data easily with automatic back-ups to your home or business network.
You'll be able to connect to company networks easily and more securely with Domain Join. And with entertainment features like Windows Media Center, it's great for home as well as for business.

Please read the below policies and make sure you fully understand what is involved in this sale:

In compliance with Microsoft licensing, recovery media, OEM media and MAR media containing Microsoft software must be redistributed as part of a complete package that contains the media, the original computer hardware with which the software was distributed and the corresponding COA label.
In compliance with the above policy, this is a sale of complete package which includes the original Dell media DVD and original hardware (Dell Optiplex computer system containing original motherboard).

OEM/Reinstall Disks/MAR Software - Recovery media, OEM media and MAR media containing Microsoft software must be redistributed as part of a complete package that contains the media, the original computer hardware with which the software was distributed and the corresponding COA label.
In compliance with the above policy, this is a sale of software bundled together with the original computer system. This item is also not intended for use by general consumers.

Microsoft Policy States: "Large brand-name computer manufacturers, such as Dell and Compaq, often include OEM software on non-holographic "recovery" or "reinstallation" discs that show the manufacturer's brand name. These software packages are typically marked with a phrase that states, for instance, "For Distribution with a new Dell PC only." Recovery or reinstallation software is licensed only for distribution with new computers and can be redistributed only with the computer for which it was initially distributed. Distributing such software with individual PC hardware components (e.g. hard drive; RAM) does not comply with Microsoft's OEM distribution requirements."
