OEM Software Notice:

- To purchase OEM System Builder software, you must be a System Builder and accept the System Builder License. "System Builder" means an original equipment manufacturer, an assembler, a Refurbisher, or a software preinstaller that sells the Customer System(s) to a third-party. OEM software may ONLY be distributed with a fully assembled computer system.
- For a desktop operating system or application software, the software also must be preinstalled on the hard drive of the fully assembled computer system, using the OEM Preinstallation Kit (OPK).
- The system builder who installs the software is responsible for the provision of end-user support

Important Information about this Product:

1. OEM software is intended for system builders and small OEMs (Original Equipment Manufacturers) who manufacture computer systems and pre-install OEM system builder software onto those systems. It is not intended for purchase or installation by consumers.
2. OEM copies cannot be transferred from one PC to another. Once you install an OEM copy of Windows Operating System on a PC it must remain with that PC forever, unless upgraded to a newer version of Windows in the future. Retail versions can be moved from PC to PC, but your retail copy of Windows Operating System cannot be installed on more than one PC at any given time.
3. OEM copies do not come with any support from Microsoft. If you need to call Microsoft for support with Windows Operating System, you must pay a fee to do so. Retail copies come with a phone support incident included in the price.

Benefits for your business:

- Join your Domain: You can connect to your business or school Domain or Azure Active Directory to use network files, servers, printers, and more.
- Enhanced encryption: Get additional security with BitLocker to help protect your data with encryption and security management.
- Remote log-in: Windows 10 enables you to log in with Remote Desktop to sign in and use your Pro PC while at home or on the road.
- Virtual machines: Create and run virtual machines with Hyper-V so you can run more than one operating system at the same time on the same PC.
- Your apps in the Store: Windows 10 lets you create your own private app section in the Windows Store for convenient access to company applications.
