

## Microsoft Windows 10 Operating System Korean Version OEM 64 Bit Package

Our Product Introduction

for more products please visit us on [computersoftware-systems.com](http://computersoftware-systems.com)

### Basic Information

- Place of Origin: USA / HongKong / Singapore / Ireland
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: Windows 10 pro OEM
- Minimum Order Quantity: 5 pieces
- Price: negotiable
- Packaging Details: OEM packing
- Delivery Time: 1-2 work day
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 5000 pieces / week

### Product Specification

- Pack: Standard OEM Pack
- Language: Korean
- Origins: Germany / French / USA
- Sample Order: Accepted
- Barcode: FQC-08983
- Shipment: Fast
- Highlight: **microsoft windows 10 pro 64 bit , window 10 pro full version**

## Product Description

### Microsoft Windows 10 Software Korean Version OEM 64 Bit Package activation online

#### Product Description:

Language	Korean
Barcode	FQC-08983
Media	64 bit
Application	Global Area
Activation	100% online activation globally
Warranty	Lifetime
Pack	Standard OEM Pack
Delivery	Delivery by DHL or to customer's requirement

#### Product Features:

- Join your Domain: You can connect to your business or school Domain or Azure Active Directory to use network files, servers, printers, and more.
- Enhanced encryption: Get additional security with BitLocker to help protect your data with encryption and security management.
- Remote log-in: Windows 10 enables you to log in with Remote Desktop to sign in and use your Pro PC while at home or on the road.
- Virtual machines: Create and run virtual machines with Hyper-V so you can run more than one operating system at the same time on the same PC.
- Your apps in the Store: Windows 10 lets you create your own private app section in the Windows Store for convenient access to company applications.

#### System Description:

If you want to upgrade to Windows 10 on your PC or tablet, here's the minimum hardware you'll need. Read further below to learn about the additional factors that impact upgradeability.

Processor: 1 gigahertz (GHz) or faster processor or SoC
RAM: 1 gigabyte (GB) for 32-bit or 2 GB for 64-bit
Hard disk space: 16 GB for 32-bit OS 20 GB for 64-bit OS
Graphics card: DirectX 9 or later with WDDM 1.0 driver
Display: 800x600

#### Important notes:

Windows 10 Home users will receive updates from Windows Update automatically when it's available. Windows 10 Pro and Windows 10 Enterprise users will have the ability to postpone updates. The amount of time that Windows 10 Pro users can postpone updates is limited.

Small storage devices, like devices with 32GB hard drives or older devices with full hard drives, may need additional storage to complete the upgrade. You'll see instructions during the upgrade telling you what to do. You may need to either remove unneeded files from your device, or insert a USB flash drive to complete the upgrade.

Some devices with either little free space available or smaller hard drives, like 32 GB storage PCs, may have little free space available after upgrading. You may free up disk space and easily delete files like temporary files or your previous version of Windows within the Storage system setting. Files for the previous version of Windows give you the option to remove Windows 10 and go back to your previous version of Windows. These files are automatically deleted a month after you upgrade. To free up space, you can delete them now.

An internet connection is required to perform the upgrade. Windows 10 is a large file -- about 3 GB -- and Internet access (ISP) fees might apply.

To check for device compatibility and other important installation information, visit your device manufacturer's website. Manufacturer contact information can be found on the Contact Information page.

The upgradeability of a device includes factors beyond the system specification. This includes driver and firmware support, application compatibility, and feature support, regardless of whether or not the device meets the minimum system specification for Windows 10.

Support may vary by device. Find more information on the Windows Lifecycle page.

If your PC or tablet is currently running Windows 7 SP1 or Windows 8.1 Update, you can check to see if it meets the requirements by using 'Check my PC' in the Get Windows 10 app. To open the Get Windows 10 app, click on the small Windows icon found at the right end of the taskbar. If you don't see it, visit our Windows 10 Q&A page for more info.

Many applications, files, and settings will migrate as part of the upgrade. However, some applications or settings may not migrate.

For anti-malware applications, Windows will check to see if your anti-malware subscription is current (not expired) and compatible during the upgrade.

If the anti-malware application is compatible and current, your application will be preserved during the upgrade to Windows 10.

If the anti-malware application is incompatible, Windows will uninstall your application while preserving your settings. After upgrade is complete, if your anti-malware provider has informed Microsoft that it has made a compatible version available for your active subscription, Windows will notify you to install the latest version available with the settings that were set prior to upgrade.

If your anti-malware subscription is not current (expired), Windows will uninstall your application and enable Windows Defender.

Some applications that came from your OEM may be removed prior to upgrade.

For certain third party applications, the "Get Windows 10" app will scan for application compatibility. If there is a known issue that will prevent the upgrade, you will be notified of the list of applications with known issues. You can choose to accept and the applications will be removed from the system prior to upgrade. Please be sure to copy the list before you accept the removal of the application.

Microsoft Family Safety child users with local accounts (accounts tied to the machine) will not have their safety settings migrated to Windows 10 during the upgrade. This means that after the upgrade to Windows 10 is complete, parents would need to setup safety settings for the child user along with a Microsoft account if they do not have one. To find out more about the changes, visit the FAQ page.

Some apps and content sold separately. Feature and app availability and experience may vary by device and market.
