

Ms Original Windows 10 Pro Retail Box 32/64 Bit Genuine License Coa Oem Product Key Code

Our Product Introduction

for more products please visit us on computersoftware-systems.com

Basic Information

- Place of Origin: USA / Customize
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: Windows 10 product key
- Minimum Order Quantity: 10 pieces
- Price: Negotiable
- Packaging Details: sticker
- Delivery Time: Within 48 hours
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 10000 pieces / week

Product Specification

- Version: OEM
- Made In: Ireland
- Pack: PP Bag
- Languages: English
- Platform: Windows
- Microsoft Edge: Yes
- Highlight: **windows 10 pro product key,
windows 10 home full version**

Product Description

MS ORIGINAL WINDOWS 10 PRO 32/64 BIT GENUINE LICENSE COA OEM PRODUCT KEY CODE

The product key label is a white or orange label that accompanies the installation CD/DVD/USB and Certificate of Authenticity (COA) for a product and contains a 25 character product key. The product key label should not be purchased separately.

This product key label is a white label that accompanies the installation CD/DVD/USB and Certificate of Authenticity (COA) for a product and contains a 25 character product key. In addition to the barcode and product key there is a small amount of print on the left edge and the top right corner. On close inspection (a magnifying glass may be required) the name "MICROSOFT" can be seen in blue in the left side and in green on the right side. The product key label should not be purchased separately.

Windows 10 Embedded Product Key Tool

Are you having trouble with your Windows?

Before you reinstall, have you considered using a custom boot repair CD that might be able to save you the hassle of a format and reinstall? Easy Recovery Essentials for Windows can fix your non-booting PC with just one click, without losing any of your data!

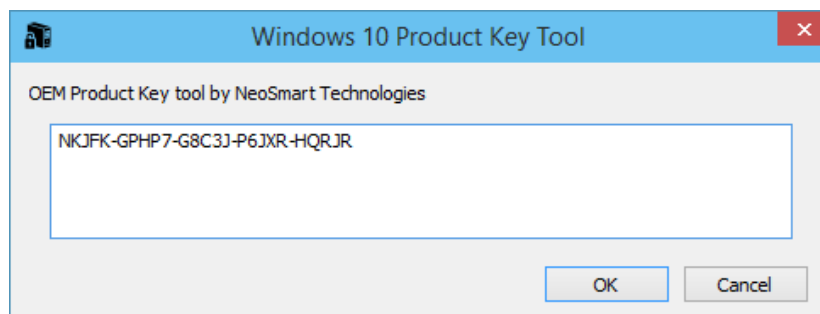

Ever since Windows 8, PCs and laptops no longer ship with the Windows Certificate of Authenticity (COA) that we've all become accustomed to seeing:

So how do you install Windows without a product key? Well, these days a product key unique to your machine (or, in some cases, to your manufacturer or make/model) is embedded into the BIOS or EFI, basically programmed into the computer itself. This prevents problems with the COA being rendered illegible, making situations like this a thing of the past:

However, the real reason computers and laptops no longer ship with COAs is because the manufacturers complained to Microsoft that having to affix a customized sticker to each and every PC or laptop they manufacture was a real (and expensive) pain in the royal you-know-what, and begged and pleaded for another option. It's simple economics, the more-easily you can mass-produce a product with as little variations as possible, the cheaper and faster it is to make it. Microsoft capitulated, and the rest, as they say, is history.

This embedded product key is not wiped when you format or reinstall, or when you replace your hard disk – it's stored in the NVRAM of the BIOS/EFI on the motherboard itself. Depending on what version of the Windows setup image you're using, it might be able to retrieve the key for itself – in which case you'll never be prompted to enter your key. It'll just directly read the programmed code from the BIOS and continue on its merry way. However, if you're trying to install Windows 7, Windows 8, or Windows 10 and you don't have a COA because your manufacturer is using an embedded product key but your setup image doesn't support it, or if you're trying to retrieve your key for safe-keeping or other purposes, our product key tool will retrieve and display it for you, without even a single click:

System requirements

If you want to upgrade to Windows 10 on your PC or tablet, here's what it takes.

Processor: 1 gigahertz (GHz) or faster processor or SoC
 RAM: 1 gigabyte (GB) for 32-bit or 2 GB for 64-bit
 Hard disk space: 16 GB for 32-bit OS 20 GB for 64-bit OS
 Graphics card: DirectX 9 or later with WDDM 1.0 driver
 Display: 800x600

Windows 10 full localization languages
