Basic Information

- Place of Origin: USA / Customize
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: Windows 10 product key
- Minimum Order Quantity: 10 pieces
- Price: Negotiable
- Packaging Details: sticker
- Delivery Time: Within 48 hours
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 10000 pieces / week

Product Specification

- Version: OEM
- Country/Region Of Manufacture: USA
- Pack: PP Bag
- Languages: English Or French
- Operating System Edition: Home
- Operating Systems: Microsoft Windows 10 64-bit
- Highlight: **windows 10 pro product key,
windows 10 home full version**

Product Description

BRAND NEW Windows 10 Home 64 bit OEM License key COA only Help sheet CPU

The Windows 10 product key is a sequence of 25 letters and numbers divided into 5 groups of 5 characters each (ex:XXXXX-XXXXX-XXXXX-XXXXX-XXXXX) that is used to activate the 32-bit or 64-bit Windows 10 edition that you have installed.

OEM PCs store and encrypt the product key in the UEFI firmware chip. The product key is no longer on a COA sticker to help prevent theft. When you reset or install Windows 10, the product key will automatically be detected from the UEFI firmware chip, and will be used to activate.

When you install an Insider Preview or retail copy of Windows 10, you will need to enter its product key during installation.

Windows 10 Enterprise does not require you to enter a product key during installation. You will have a free 90-day evaluation period before you must change the product key to be able to enter your volume license product key and activate.

Note :

If you upgraded to the free upgrade of Windows 10 from an activated Windows 7 or 8.1 PC, then you will not have a product key. Instead, the PC gets registered on Microsoft activation servers with a digital entitlement that will always be used to activate Windows 10 on that PC.

Starting with Windows 10 Insider Preview Build 14371, you can link your Microsoft account to the Windows 10 digital license (formerly called digital entitlement) on your device. This can help you reactivate Windows using the Activation troubleshooter if you make a hardware change later, such as replacing the motherboard.

Starting in Windows 10 Insider Preview build 10565:

Device activation improvements: Microsoft has received a lot of feedback from Insiders on making it easier to activate Windows 10 on devices that take advantage of the free upgrade offer to genuine Windows by using existing Windows 7, Windows 8 or Windows 8.1 product keys. If you install this build of the Windows 10 Insider Preview on a PC and it doesn't automatically activate, you can enter the product key from Windows 7, Windows 8 or Windows 8.1 used to activate the prior Windows version on the same device to activate Windows 10 by going to Settings > Update & security > Activation and selecting Change Product Key. If you do a clean install of Windows 10 by booting off the media, you can also enter the product key from prior Windows versions on qualifying devices during setup. Refer to the Insider Hub for more information on these activation improvements including requirements.

Can I reinstall Windows 10 on my computer after upgrading with free upgrade?

Once you've upgraded to Windows 10 using the free upgrade offer or Media Creation Tool on an activated Windows 7 or 8.1 PC, you will be able to reinstall, including a clean install, on the same device. You won't need a product key for re-activations on the same hardware. If you make a meaningful change to your hardware, you may need to contact customer support to help with activation. You'll also be able to create your own installation media like a USB drive or DVD, and use that to upgrade your device or reinstall after you've upgraded

System requirements

If you want to upgrade to Windows 10 on your PC or tablet, here's what it takes.

Processor: 1 gigahertz (GHz) or faster processor or SoC
 RAM: 1 gigabyte (GB) for 32-bit or 2 GB for 64-bit
 Hard disk space: 16 GB for 32-bit OS 20 GB for 64-bit OS
 Graphics card: DirectX 9 or later with WDDM 1.0 driver
 Display: 800x600
