#### Features :

Windows 8.1 brings together everything you do - from mobile apps for your business, to Office productivity work, to searching and browsing, to accessing all your data from anywhere.

Your Windows experience works across all your devices - from the best business tablet, to a thin and light notebook, to your high-performance workstation or all-in-one, whether you are at home, in or around the office, or working on the road.

And Windows takes care of the essentials - letting you manage personal devices in your organization, utilize your investments in your enterprise infrastructure, and enhancing the security of your environment.

The Windows 8.1 retail media isn't much changed from that of Windows 8. This time around, we get fewer color schemes, but a useful new "Welcome to Windows" guide that is a bit more expansive than the one-page pamphlet Microsoft provided last time around.

To better understand what's happening with this version's retail media to that of Windows 8, please refer to my post Windows 8 Pro Retail Box from last year.

But here's a rundown of how they compare.

Full version. One big change, of course, is that Windows 8.1 is available only in the so-called Full version, where Windows 8 was only available in Upgrade form. But this doesn't mean you can't use this product to upgrade, though it only makes sense to do so in Windows 7 (since the Windows 8 to 8.1 upgrade is free). And even then, you can't perform a "full" in-place upgrade from Windows 7 to Windows 8.1 with this media: All you get is a basic migration option in which you can bring your personal files forward, but not settings or installed applications.

No special pricing. One downside to this year's product is that there's no special promotional pricing, so you'll pay full price for a retail version of Windows 8.1: That's \$119.99 for Windows 8.1 "Core" and \$199.99 for Windows 8.1 Pro. With Windows 8, you may recall, Microsoft offered special promotional pricing of \$69.99 for Windows 8 Pro at retail, through January 31, 2013. You could do even better if you purchased the product electronically: that version was just \$39.99.

New design. It's not a big deal, but where Windows 8 and Windows 8 Pro came in colorful boxes—the Pro version offered five different designs at retail—Microsoft has gone conservative with Windows 8.1. The "Core" box I bought—and I only got one because of the exorbitant pricing—is a flat purple and white design, while Pro comes with blue and white.

#### System Requirements:

- 1 GHz processor or faster with support for PAE, NX, and SSE2
- 2 GB RAM
- 20 GB available hard disk space
- 1366 x 768 screen resolution
- DirectX 9 graphics processor with WDDM driver
- To use touch, you need a PC that supports multitouch
