Windows 8.1 Pro 64 Bit English International Windows 8.1 Pro Pack

Basic Information

- Place of Origin: Ireland / Customize
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: Windows 8.1 OEM
- Minimum Order Quantity: 10 pieces
- Price: Negotiable
- Packaging Details: Retail packing
- Delivery Time: 2 work days
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 10000 pieces / week

Product Specification

- Language Option: English Or Others
- Good Service: FREE Tech Support
- Activation Way: Online
- Version: OEM
- Free Sample: Available
- Free Shipment: Yes
- Highlight: **windows 8.1 pro pack**,
                                        microsoft windows 8.1 oem

Microsoft Windows 8.1 Professional 64 bit English International Pack online activation

Windows 8.1 (codenamed Blue) is an upgrade for Windows 8, a computer operating system released by Microsoft. First unveiled and released as a public beta in June 2013, it was released to manufacturing on August 27, 2013, and reached general availability on October 17, 2013, almost a year after the retail release of its predecessor. Windows 8.1 is available free of charge for retail copies of Windows 8 and Windows RT users via the Windows Store. Unlike service packs on previous versions of Windows, users who obtained Windows 8 outside of retail copies or pre-loaded installations (i.e., volume licensing) must obtain Windows 8.1 through new installation media from their respective subscription or enterprise channel. Microsoft's support lifecycle policy treats Windows 8.1 similar to previous service packs of Windows: It is part of Windows 8's support lifecycle, and installing Windows 8.1 is required to maintain access to support and Windows updates after January 12, 2016. However, unlike previous service packs, Windows 8.1 cannot be acquired via Windows Update.

Released as part of a shift by Microsoft towards regular yearly major updates for its software platforms and services, Windows 8.1 aims to address complaints of Windows 8 users and reviewers on launch. Visible enhancements include an improved Start screen, additional snap views, additional bundled apps, tighter OneDrive (formerly SkyDrive) integration, Internet Explorer 11, a Bing-powered unified search system, restoration of a visible Start button on the taskbar, and the ability to restore the previous behavior of opening the user's desktop on login instead of the Start screen. Windows 8.1 also added support for such emerging technologies as high-resolution displays, 3D printing, Wi-Fi Direct, and Miracast streaming, as well as the ReFS file system.[5]

Windows 8.1 received mixed reception, although more positive than Windows 8, with critics praising the expanded functionality available to apps in comparison to 8, its OneDrive integration, along with its user interface tweaks and the addition of expanded tutorials for operating the Windows 8 interface. Despite these improvements, Windows 8.1 was still criticized for not addressing all digressions of Windows 8 (such as a poor level of integration between Metro-style apps and the desktop interface), and the potential privacy implications of the expanded use of online services. As of December 2016, the market share of Windows 8.1 is 8.43%.

Product Features

New Start screen with a familiar desktop
Popular, unique apps keep your productive and entertained
Enhanced personalization options
Make multitasking easy with side-by-side apps and websites
Built-in SkyDrive, IE11, and new Smart Search
BitLocker encryption keeps your data secure
Remote desktop access makes it easy to connect two PCs
Domain Join simplifies your connection to a company network

How to Change Windows 8 From French to English?

Windows 8 and Windows 8.1 support both French and English. If your computer is set up in French, you can switch to English at any time, although you may need to install the free English language pack, if it's not already on your system.

Set Default to English

Press "Windows-X" and select "Panneau de Configuration" (Control Panel) from the options. In the Control Panel window, select "Ajouter une Langue" (Add a Language). If you see English listed as an option on the next screen, select it and click "Monter" (Move Up) to move it up to the top of the list. Sign out of Windows and sign back in to change the language to English. If you don't see English in the list, or your computer still shows French, install the English language pack.

Install Language Pack

Click the "Ajouter une Langue" (Add a Language) button on the screen that lists the available languages, and double-click "English (United States)" to add it as an option. Move it up to the top of the list using the "Monter" (Move Up) button, and then click the "Options" link. If you see a "Telecharger et Installer le Module Linguistque" (Download and Install Language Pack) link, click the link and allow Microsoft to download and install the English language pack. Sign out of Windows and then sign back in to change the language to English.

System Requirements:

Windows 8.1 Pro 64-bit System Requirements	
Processor	1 Gigahertz or faster 64-bit (x64) with support for PAE, NX, and SSE2
Memory	2 Gigabyte (GB) RAM
Hard Disk	20 GB available space
Graphics card	Diretx 9 graphics device with WDDM 1.0 or higher

Additional requirements to use certain features:

1 . To use touch, you need a tablet or a monitor that supports multitouch
2 . Microsoft account required for some features
3 . Some games and programs might require a graphics card compatible with DirectX 10 or higher for optimalperformance
4 . Watching DVDs requires separate playback software
5 . Windows Media Center license sold separately
6 . BitLocker To Go requires a USB flash drive
7 . BitLocker requires either Trusted Platform Module (TPM) 1.2 or a USB flash drive (Windows 8.1 Pro only)
8 . Client Hyper-V requires a 64-bit system with second level address translation (SLAT) capabilities and additional 2 GB of RAM (Windows 8.1 Pro only)
9 . Wi-Fi Direct Printing requires a Wi-Fi adapter that supports Wi-Fi Direct and a device that supports Wi-Fi Direct Printing
10 . To install a 64-bit OS on a 64-bit PC, your processor needs to support CMPXCHG16b, PrefetchW, and LAHF/SAHF
