- Delivery Time: 1-3 work days
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 100000 pieces / month

Product Specification

- Feature: Simplify , Customize
- Delivery: 1~3 Days
- Version: KEY Sticker
- Activation: Online
- Payment: T/T/Western Union
- Shipping: DHL / EMS / Air Cargo
- Highlight: **windows 8.1 pro product key,
microsoft windows 8.1 pro pack**

Product Description

Genuine OEM Software Windows 8.1 pro Product Key Sticker Windows License Sticker

Product Description :

Use of this OEM System Builder Channel software is subject to the terms of the Microsoft OEM System Builder License. This software is intended for pre-installation on a new personal computer for resale. This OEM System Builder Channel software requires the assembler to provide end user support for the Windows software and cannot be transferred to another computer once it is installed. To acquire Windows software with support provided by Microsoft please see our full package "Retail" product offerings.

Looking for your product key? The product key is a 25-digit string with a hyphen between each 5 digits. It will say "Product Key" before 25 digits or have an image of a key next to 10 digits with the remaining 15 on the next line below. The Product Key is generally located in the lower left corner of the DVD case, on the disc itself, or on a leaflet in the packaging you received.

The box design you receive may differ from that shown in the image above. The image to the right shows the different designs available.

If you currently have a personal computer running Windows 7, Windows XP with SP3 or Windows Vista then you can upgrade to Windows 8 Pro (Professional). With Windows 8 Pro, you can connect and share your files. Windows 8 Pro also adds enhanced features if you need to connect to company networks, access remote files, encrypt sensitive data, and other more advanced tasks.

The new Windows 8 start screen is your personalised home for items you use the most and can be customised according to your user preferences. Windows 8 Live tiles provide real-time updates from your Facebook, Twitter, and e-mail accounts. Along with the new Start screen, the lock screen now includes e-mail, calendar, and clock widgets.

To access your PC, Microsoft has replaced a standard PIN or password with a swipe gesture; unlock your PC by clicking or swiping preset locations you've selected on the lock screen. New functions also allow you to search for your favorite software programs, open, close, hide, resize, or run multiple apps simultaneously with the swipe of a finger or a swipe of the mouse.

Windows has also made changes to make your PC more secure by boosting its existing security features and adding "SmartScreen," which acts to prevent suspicious programs or apps from being installed or running on your machine. Finally, Windows 8 also gives you the ability to "refresh" itself to give users a new starting point and a cleaner version of Windows.

You can upgrade to Windows 8 from Windows 7, Windows Vista, Windows XP, Windows 8 Release Preview, Windows 8 Consumer Preview, or Windows Developer Preview, but you might not be able to keep all of your files, software programs, and settings. The following table shows what you can keep during an upgrade, depending on the current version of Windows you are running. If you choose to boot from removable media, you won't be able to keep your software programs, Windows settings, or personal files when you upgrade.

Activate Windows 7 or Windows 8.1

Activation helps verify that Windows hasn't been used on more PCs than the Microsoft Software License Terms allow.

To activate Windows 7 or Windows 8.1, you'll need a product key for the version of Windows that's on your PC. A product key is a 25-character code that looks like this:

PRODUCT KEY: XXXXX-XXXXX-XXXXX-XXXXX-XXXXX

How to find your product key depends on how you got your copy of Windows 7 or Windows 8.1:

If you bought Windows from an authorized retailer, the product key will be on a label inside the box it came in.

If you bought a new PC running Windows, the product key will be preinstalled on your PC, included with the packaging the PC came in, or included on the Certificate of Authenticity (COA) attached to the PC.

If you bought a digital copy of Windows from a Microsoft website, the product key will be in the confirmation email you received after buying it.

If you need to install or reinstall Windows 8.1, you can use the tools on this page to create your own installation media using either a USB flash drive or a DVD.

Before you begin

Make sure you have:

An internet connection (internet service provider fees may apply).

Sufficient data storage available on a computer, USB or external drive for the download.

A blank USB or DVD (and DVD burner) with at least 4 GB of space if you want to create media. We recommend using a blank USB or blank DVD, because any content on it will be deleted.

Read the System Requirements.

If you will be installing the operating system for the first time, you will need your Windows product key (xxxxx-xxxxx-xxxxx-xxxxx-xxxxx). For more information about product keys and when they are required, visit the FAQ page.

For Enterprise editions please visit the Volume Licensing Service Center.

Use the media creation tool (aprx. 1.41MB) to download Windows. This tool provides the best download experience for customers running Windows 7, 8.1 and 10. Tool includes:

File formats optimized for download speed.

Built in media creation options for USBs and DVDs.

Optional conversion to ISO file format.

Everything you already love. And a lot more. Mouse, keyboard, and familiar programs

Get a new touchscreen PC and you can still work with a mouse, keyboard, and the Windows desktop the way you always have. Use virtually any printer. Programs that work on Windows 7 work on Windows 8.1.

All the basics, from startup times to security, are better than ever.

Multitasking, a swipe away

Windows 8.1 gives you a world of touchscreen entertainment with apps from the Windows Store, and new ways to tap, swipe, and navigate seamlessly. Multitask with up to four separate apps at the same time on Windows tablets and PCs, so you can work and play at the same time. And OneDrive—free online storage that's built into Windows 8.1—means your files are always with you, from any of your PCs or devices.

Compare Windows 7 to Windows 8.1

	Windows 7	Windows 8.1
The familiar desktop	Windows 7 ✓	Windows 8.1 ✓

Connects to your corporate or school network with Domain Join.		✓
Watch and record live TV with Windows Media Center.***		

Win8 / 8.1 System requirements:

1GHz or faster 32-bit (x86) or 64-bit (x64) processor

1GB RAM (32-bit) / 2GB RAM (64-bit)

16GB available disk space (32-bit) / 20 GB (64-bit)

DirectX 9 graphics device with WDDM 1.0 or higher driver

This operating system is eligible for a free upgrade to Windows 10 when available. More details below.

The Start screen. Personalize your Start screen with your favorite news, friends, social networks, and apps. Customizable colors and backgrounds and four different tile sizes make your device as unique as you are.

The apps you want. In addition to great built-in apps for e-mail, people, photos and video editing, you can also download thousands of popular apps from the Windows Store, including Netflix, ESPN, Skype, and Halo: Spartan Assault.

It plays as hard as it works. Windows 8.1 gives you the power to quickly browse, watch movies, play games, polish your resume, and pull together a killer presentation - all on a single PC.
