

## Multi - function 32bits 64bits Win 8.1 Pro Product Key Full Version! For 1 PC Using

### Our Product Introduction

for more products please visit us on [computersoftware-systems.com](http://computersoftware-systems.com)

#### Basic Information

- Place of Origin: USA or others
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: windows 8.1 product key
- Minimum Order Quantity: 20 pieces
- Price: Negotiable
- Packaging Details: Lable
- Delivery Time: 1-3 work days
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 100000 pieces / month

#### Product Specification

- Customize Feature: Available
- Meida: 64bit
- Status: Large Quantity In Stock
- Quality: Awesome
- Freight: More Than 10 Pieces Free
- Shipping: DHL First
- Highlight: **microsoft windows 8.1 pro pack,  
windows 8.1 pro oem 64 bit**

## Product Description

### Multi-function 32bits 64bits Softwares Windows 8.1 Pro Pack Full Version! For 1 PC Using

#### Typing safe

The on-screen keyboard was another strong point of the Metro environment. It's now better. One of the downsides of the Windows 8 keyboard was that it only offered a single option for autocompletion. This felt limiting when compared to the keyboards on Android and Windows Phone with their suggestion bars. However, the iOS-like placement of the suggestion—at the point of entry rather than above the keyboard—made it easier to see, as they avoided the need to glance back and forth between the keyboard and the content you're typing.

In Windows 8.1, Microsoft brings us the best of both worlds. Instead of a single suggestion appearing, you'll now get a trio of options. Swiping left and right along the space bar of the keyboard will pick between the options. Tapping space or hitting a punctuation key will then select the chosen option. It's a neat system that brings the best of both worlds.

The suggestions themselves get updated from data from the Bing team. This means that suggestions can in principle reflect current trends and hot topics of discussion. I was, however, disappointed to see that "twerking" is not in its suggestion list.

#### Over on the desktop

I've looked before at the changes Windows 8.1 brings to the other side of Windows: the desktop. Though there are a few options to control minor behavioral aspects of the operating system, the desktop changes have two focal points: the reinstatement of the Start button on the taskbar and the option—off by default—to boot to the desktop rather than to the Start screen.

I continue to dislike the new Start button. The purpose of the button is simple; it reinstates a familiar visual cue (well, not that familiar, as the Start button never had this particular logo) for desktop users to use to reach the Start screen.

But in doing this, it serves only to make an operating system already struggling for consistency even less consistent. Metro apps still don't show the Start button. They still depend on hot corners. And while it arguably wasn't the case in Windows 8, in Windows 8.1 some of the built-in Metro apps are actually pretty good. Where once mouse and keyboard users were arguably well advised to ignore the Metro apps, now I think they should be encouraged to use them.

Using them, however, means learning the hot corners, lest you get trapped in an application. And here's the thing: once you've learned the hot corners, you can use them everywhere. There's no need for the Start button on the taskbar: you can use the corner.

Microsoft did a horrible job of teaching people about the hot corners in Windows 8. I just don't think that putting the Start button there some of the time, in a "now you see me, now you don't" kind of a way, fixes anything. It might even be worse, with people looking for a button that they know was there earlier but isn't there any more.

#### Compare Windows 7 to Windows 8.1

	Windows 7	Windows 8.1
The familiar desktop	Windows 7 ✓	Windows 8.1 ✓
Works with a mouse and keyboard	Windows 7 ✓	Windows 8.1 ✓
Works with Word, Excel, Outlook, and other familiar programs	Windows 7 ✓	Windows 8.1 ✓
Built for touch PCs and tablets	Windows 7	Windows 8.1 ✓
Apps from the Windows Store	Windows 7	Windows 8.1 ✓
Mail, People, and other built-in apps	Windows 7	Windows 8.1 ✓
Keep your settings and apps on all your PCs and devices	Windows 7	Windows 8.1 ✓
Bing smart search to find things across the web, apps, and your PC	Windows 7	Windows 8.1 ✓
Start screen with live updates	Windows 7	Windows 8.1 ✓
Faster startup times	Windows 7	Windows 8.1 ✓

#### Background Information

Released as part of a shift by Microsoft towards regular yearly major updates for its software platforms and services, Windows 8.1 aims to address complaints of Windows 8 users and reviewers on launch. Visible enhancements include an improved Start screen, additional snap views, additional bundled apps, tighter OneDrive (formerly SkyDrive) integration, Internet Explorer 11,

a Bing- [Windows 8.1 ISO Desktop] powered unified search system, restoration of a visible Start button on the taskbar, and the ability to restore the previous behavior of opening the user's desktop on login instead of the Start screen. Windows 8.1 also added support for such emerging technologies as high-resolution displays, 3D printing, Wi-Fi Direct, and Miracast streaming.

Windows 8.1 received mixed reception, although more positive than Windows 8, with critics praising the expanded functionality available to apps in comparison to 8, its OneDrive integration, along with its user interface tweaks and the addition of expanded tutorials for operating the Windows 8 interface. Despite these improvements, Windows 8.1 was still criticized for not addressing all digressions of Windows 8 (such as a poor level of integration between Metro-style apps and the desktop interface), and the potential privacy implications of the expanded use of online services. As of March 2016, the market share of Windows 8.1 is 10.30%.

#### The New Windows

The New Windows	Windows 8.1	Pro Pack
Great Apps built in such as Mail, Calendar, Messaging, Photos, and SkyDrive with many more available at Windows Store.	✓	✓
Includes Internet Explorer 11 for fast, intuitive, touch-friendly browsing.	✓	✓

Works with new and existing Windows desktop software including the full Microsoft Office experience (Outlook, SharePoint Designer and more).*	✓	✓
Comes with Windows Media Player	✓	✓
Provides enhanced data protection using BitLocker technology to help keep your information secure.**		✓
Enables you to connect to your PC when you're on the go with Remote Desktop Connection.		✓
Connects to you corporate or school network with Domain Join.		✓
Watch and record live TV with Windows Media Center.***		

#### Win8 / 8.1 System requirements:

1GHz or faster 32-bit (x86) or 64-bit (x64) processor

1GB RAM (32-bit) / 2GB RAM (64-bit)

16GB available disk space (32-bit) / 20 GB (64-bit)

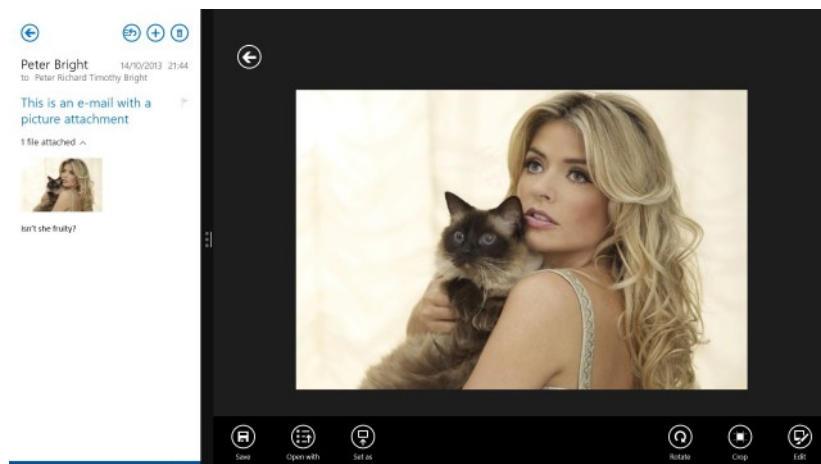

DirectX 9 graphics device with WDDM 1.0 or higher driver

This operating system is eligible for a free upgrade to Windows 10 when available. More details below.

The Start screen. Personalize your Start screen with your favorite news, friends, social networks, and apps. Customizable colors and backgrounds and four different tile sizes make your device as unique as you are.

The apps you want. In addition to great built-in apps for e-mail, people, photos and video editing, you can also download thousands of popular apps from the Windows Store, including Netflix, ESPN, Skype, and Halo: Spartan Assault.

It plays as hard as it works. Windows 8.1 gives you the power to quickly browse, watch movies, play games, polish your resume, and pull together a killer presentation - all on a single PC.
