

32/64 Genuine Win 7 Professional Product Key License In Good Condition

Basic Information

- Place of Origin: Ireland
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: windows 7 product key
- Minimum Order Quantity: 10 unit
- Price: Negotiable
- Packaging Details: lable
- Delivery Time: in 48 hours
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 10000 units/week

Product Specification

- Version: Windows 7 Pro
- Memory: 1 GB
- HDD Free Space: 16 GB Of Free Disk Space
- Optical Drive: DVD-ROM Drive
- SATA AHCI Support: AHCI (SATA)
- Payment: Various Ways
- Highlight: **microsoft windows 7 professional product key, win 7 home premium product key**

Product Description

Windows 7 Pro Professional 32/64 Genuine Product Key License In Good Condition

Product Description:

Windows 7 is an operating system released by Microsoft on July of 2009. The stable release and first service pack were more than a year later in February of 2011. Windows 7 is not the most recent operating system from Microsoft, as Windows 8 was released in 2012. Windows 7 has recently managed to surpass Windows XP in market share, and as of 2012, held over 44 percent of the market.

Windows 7 is generally agreed to be the current best operating system released by Microsoft. Windows 8 and Windows Vista were both met with a great deal of controversy over large changes to the system. Windows 8, in particular, is regarded as a decent system plagued by a terrible user interface, called Metro.

Windows 7 has made great improvements in respect to software security and performance, relative to XP and Vista. Windows 7 also supports a flexible 64-bit system that can almost seamlessly run 32-bit programs without jumping through the hoops that other operating systems, such as Linux require. It is generally recommended that customers wait until at least service pack one is released before switching to a new Windows operating system. These packs are programming fixes

Windows 7 Processors

Windows 7 comes in two versions, 32- and 64-bit processors, with 64-bit processors representing the latest innovation in processors at the time. The section below details both processor types.

32-bit: Created by Intel Corporation and manufactured by both Intel and AMD. The 32-bit processor was the most common processor type until 2011 when 64-bit processors came to the forefront of computing power.

64-bit: The next step in processors following IA-32. The 64-bit processor can support a wider amount of virtual and physical memory than a 32-bit processor. Originally created by AMD, the processor is manufactured by AMD, Intel, and others.

If you Upgrade to Windows 7 Home Premium. Windows 7 Home Premium makes it easy to create a home network and share all of your favorite photos, videos, and music. You can even watch, pause, rewind, and record TV (a broadcast TV tuner may be required). Get the best entertainment experience with Windows 7 Home Premium. Do you use your PC for work, run Windows XP programs, or require enhanced security? Consider Windows 7 Professional.

Hardware Requirements:

Windows 7 has some basic requirements to allow for uploading to a computer. The table below lists the various hardware requirements.

Architecture	32-bit	64-bit
Processor	1 GHz IA-32 processor	1 GHz x86-64 processor
Memory (Ram)	1 GB	2 GB
Graphics Card	DirectX 9 graphics processor with WDDM driver model 1.0	DirectX 9 graphics processor with WDDM driver model 1.0
HDD free space	16 GB of free disk space	20 GB of free disk space
Optical Drive	DVD-ROM drive	DVD-ROM drive
SATA AHCI Support	AHCI (SATA)	AHCI (SATA)

When installing Windows 7 users need to make sure that they set the BIOS to emulate AHCI (SATA) hard drives. This setting must be changed before loading any AHCI or RAID drivers.

Physical Memory Limits

Physical memory is the actual memory space in which the computer can store data. This usually comes in the form of memory chips and are referred to as DRAM modules. The table below covers physical memory limits for both 32- and 64-bit processors.

Version	Limit in 32-bit Windows	Limit in 64-bit Windows
Windows 7 Ultimate	4 GB	192 GB
Windows 7 Enterprise	4 GB	192 GB
Windows 7 Professional	4 GB	192 GB
Windows 7 Home Premium	4 GB	16 GB
Windows 7 Home Basic	4 GB	8 GB
Windows 7 Starter	2 GB	N/A
