Product Key Of Microsoft Office 2013 Professional Plus Retail Pack + Standard Genuine License

Basic Information

- Place of Origin: USA
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: office 2013 pro
- Minimum Order Quantity: 5 pieces
- Price: Negotiable
- Packaging Details: retail packing
- Delivery Time: 1-3 work days
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 1000 pieces / week

Product Specification

- Version: Office 2013 Pro Plus
- Format: CD
- Hard Disk Drive: 3GB
- Min. Processor Speed: 1GHz
- Feature: No Language Limitation
- Language: English
- Highlight: **microsoft office 2013 professional plus key**, **microsoft office 2013 software**

Product Description

Microsoft Office 2013 Professional plus retail pack + standard Genuine License

Editions:

Traditional editions

As with previous versions, Office 2013 is made available in several distinct editions aimed towards different markets. All traditional editions of Microsoft Office 2013 contain Word, Excel, PowerPoint and OneNote and are licensed for use on one computer.

Five traditional editions of Office 2013 were released:
Home & Student: This retail suite includes the core applications Word, Excel, PowerPoint, and OneNote.
Home & Business: This retail suite includes the core applications Word, Excel, PowerPoint, and OneNote plus Outlook.
Standard: This suite, only available through volume licensing channels, includes the core applications Word, Excel, PowerPoint, and OneNote plus Outlook and Publisher.
Professional: This retail suite includes the core applications Word, Excel, PowerPoint, and OneNote plus Outlook, Publisher and Access.
Professional Plus: This suite, only available through volume licensing channels, includes the core applications Word, Excel, PowerPoint, and OneNote plus Outlook, Publisher, Access, InfoPath and Lync.

Office 365

The Office 365 subscription services, which were previously aimed towards business and enterprise users, were expanded for Office 2013 to include new plans aimed at home use. The subscriptions allow use of the Office 2013 applications by multiple users using a software as a service model. Different plans are available for Office 365, some of which also include value-added services, such as 20 GB of OneDrive storage (later increased to 1 TB) and 60 Skype minutes per month on the new Home Premium plan.These new subscription offerings were positioned as a new option for consumers wanting a cost-effective way to purchase and use Office on multiple computers in their household.

Office RT

A special version of Office 2013, initially known as Office 2013 Home & Student RT, is shipped with all Windows RT devices. It initially consisted of Word, Excel, PowerPoint and OneNote. In Windows RT 8.1, the suite was renamed Office 2013 RT and Outlook was added. The edition, whilst visually indistinguishable from normal versions of Office 2013, contains special optimizations for ARM-based devices, such as changes to reduce battery usage (including, for example, freezing the animation of the blinking cursor for text editing during periods of inactivity), enabling touch mode by default to improve usability on tablets, and using the graphics portion of a device's SoC for hardware acceleration.

Windows RT devices on launch were shipped with a "preview" version of Office Home & Student 2013 RT. The release date for the final version varied depending on the user's language, and was distributed through Windows Update when released. On June 5, 2013, Microsoft announced that Windows RT 8.1 would add Outlook to the suite in response to public demand.

Office RT modifies or excludes other various features for compatibility reasons or resource reduction. To save disk space; templates, clip art, and language packs are downloaded online rather than stored locally. Other excluded features include the removal of support for third-party code such as macros/VBA/ActiveX controls, the removal of support for older media formats and narration in PowerPoint, editing of equations generated with the legacy Equation Editor, data models in Excel (PivotCharts, PivotTables, and QueryTables are unaffected), searching embedded media files in OneNote, along with data loss prevention, Group Policy support, and creating e-mails with information rights management in Outlook.

As the version of Office RT included on Windows RT devices is based off the Home & Student version, it cannot be used for "commercial, nonprofit, or revenue-generating activities" unless the organization has a volume license for Office 2013 already, or the user has an Office 365 subscription with commercial use rights.

Windows Store apps

Alongside Office RT, free versions of OneNote and the Lync client were made available as Windows Store apps upon the release of Windows 8 and RT.[59] The OneNote app, originally known as OneNote MX, contains a limited feature set in comparison to its desktop version, but is also optimized for use on tablets.The OneNote app has since received several major updates, including camera integration, printing abilities, and multiple inking options.
Universal Microsoft Word, Excel, and PowerPoint apps for Windows 10 are in the preview stage and are set for release later in 2015.

Office Mobile

Windows Phone 8 ships with an updated version of the Office Mobile suite, consisting of mobile versions of Word, Excel, PowerPoint, and OneNote. In comparison to their Windows Phone 7 versions, the new versions add an improved Office Hub interface that can sync recently opened and modified documents (including changes to documents stored via Office 365 and SkyDrive),a separated OneNote app with additional features (such as voice notes and integration with the new "Rooms" functionality of the OS), and improved document editing and viewing functionality.

In June 2013, Microsoft released a version of Office Mobile for iPhone; it is similar to the Windows Phone version, but originally requires an Office 365 subscription to use.[64] A version for Android smartphones was released in July 2013; it, too, originally needed Office 365 for use.

Apps for iPad and Android tablet computers were released in March 2014 and January 2015, respectively.[66][67] These, along with their smartphone equivalents, have been made free for personal use, though certain premium features have been

paywalled and require Office 365, which includes licensing of the apps for business use.

Windows 10 Mobile, set for release later in 2015,will come with brand new Office apps, more in line with their iPhone and Android equivalent, and making use of the "universal app" platform pioneered with Windows 10.

Software included:

Microsoft Word
Microsoft Excel
Microsoft Access
Microsoft PowerPoint
Microsoft OneNote
Microsoft Publisher
Microsoft Outlook

Compatibility

Windows 7
Windows 8
Windows 8.1
Windows 10

Product Support
