

## English Windows Server 2008 Versions OEM Pack 25 CLT 100% activation

### Basic Information

- Place of Origin: Ireland
- Brand Name: Microsoft
- Certification: Microsoft Certified
- Model Number: windows server 2008 standard
- Minimum Order Quantity: 5 pieces
- Price: Negotiable
- Packaging Details: Factory Sealed Retail box / OEM
- Delivery Time: 2-3 work days
- Payment Terms: T/T, Western Union, MoneyGram,
- Supply Ability: 3000 pieces / week

### Product Specification

- Media: DVD
- Package: OEM
- Clients: 25
- Activation: 100% Online
- Made In: USA
- Shipping: Fast
- Highlight: windows server 2008 r2 standard, win server 2008 r2 enterprise

## Product Description

English Win Server 2008 R2 Enterprise OEM Pack 25 CLT 100% activation Made in USA

### Product Description :

A second release, Windows Server 2008 R2, was released on October 22, 2009.[34] Retail availability began September 14, 2009.[35] Windows Server 2008 R2 reached the RTM milestone on July 22, 2009.[36] Like Windows 7, it is built on Windows NT 6.1. New features include new virtualization features, new Active Directory features, IIS 7.5, and support for 256 logical processors. Support for 32-bit-only processors (IA-32) has been removed. On July 22, 2009, Microsoft officially announced that they had released both Windows Server 2008 R2 and Windows 7 to manufacturing. Windows Server 2008 R2 was generally available for download from MSDN and Technet on August 19 and for retail purchase from October 22, 2009.

### Editions

Compared to its predecessor, most editions of Windows Server 2008 are available in x86-64 and IA-32 versions. These editions come in two DVDs: One for installing the IA-32 variant and the other for x64. Windows Server 2008 for Itanium-based Systems supports IA-64 processors. Microsoft has optimized the IA-64 version for high-workload scenarios like database servers and Line of Business (LOB) applications. As such, it is not optimized for use as a file server or media server. Microsoft has announced that Windows Server 2008 is the last 32-bit Windows server operating system.[28] Editions of Windows Server 2008 include:

Windows Server 2008 Standard (IA-32 and x86-64)

Windows Server 2008 Enterprise (IA-32 and x86-64)

Windows Server 2008 Datacenter (IA-32 and x86-64)

Windows HPC Server 2008 (Codename "Socrates") (replacing Windows Compute Cluster Server)

Windows Web Server 2008 (IA-32 and x86-64)

Windows Storage Server 2008 (Codename "Magni") (IA-32 and x86-64)

Windows Small Business Server 2008 (Codename "Cougar") (x86-64) for small businesses

Windows Essential Business Server 2008 (Codename "Centro") (x86-64) for medium-sized businesses

Windows Server 2008 for Itanium-based Systems

Windows Server 2008 Foundation (Codename "Lima") (x86-64) for OEMs only

The Microsoft Imagine program, known as DreamSpark at the time, used to provide verified students with the 32-bit variant of Windows Server 2008 Standard Edition, but the version has since then been removed. However, they still provide the R2 release.

The Server Core feature is available in the Web, Standard, Enterprise and Datacenter editions.

### Compare versions of Windows Sever :

Features		Server 2003	Server 2008 / 2008 R2	Server 2012	Server 2012 R2
