Product Description

Microsoft Office Home and Business 2013 Product Key Retail FPP License Brand New

Description:

Office Home & Business 2013 is designed to help you create and organize faster with time saving features and a clean, modern look. Plus, you can save your documents in the cloud on SkyDrive and access them when you are not at home.

What's new in this release of Office?

The 2013 versions of familiar Office applications such as Word, Excel, and PowerPoint include new features that help you create, communicate and work efficiently from virtually anywhere. In addition to updating the traditional Office suites, Microsoft has developed brand new subscription versions of Office, specifically designed around the way customers use Office. Each new subscription offer will include the 2013 versions of the Office applications, for example Word, Excel and PowerPoint, plus cloud services such as Skype world minutes and online storage with SkyDrive.

Subscribers will also receive future rights to version upgrades as well as per-use rights across multiple PCs or Macs and select mobile devices. Note: The Office applications you can use across PCs, Macs and other devices vary by platform.

Visit www.office.com/information for a current list of devices. Internet connection required. Internet and mobile telephone usage charges may apply.

What is the difference between the Office 2013 suites and Office 365 plans?

Microsoft Office is still the name Microsoft uses for its familiar productivity software. Office suites have traditionally included applications such as Word, Excel, PowerPoint, and Outlook. All Office 2013 suites include the latest versions of the applications, for use on a single PC.

Microsoft uses the name "Office 365" for products that include cloud services, such as additional SkyDrive online storage, Skype minutes for home use, Lync web conferencing or Exchange Online hosted email for businesses. Cloud services are features that are enabled over the Internet. Most Office 365 plans also include the full-featured Office 2013 applications, which users can install across multiple computers and devices. All Office 365 products, such as Office 365 Home Premium, are paid for on a subscription basis, annually. Active subscribers will receive future rights to version upgrades as a benefit of their subscription. Entitlements vary by product.

Use Word, Excel, PowerPoint, OneNote and Outlook to simplify and share your information

Word

In the new Read Mode, text reflows automatically in columns for easier on-screen reading
Fewer menus means more focus on your content—see only the tools you need, when you need them
Open a PDF in Word, and edit content just as if you created it in Word
Show your style by using Word templates in more than 40 categories

Excel

Each workbook has in its own window, making it easier to work on two workbooks--or two monitors-- at once
New functions in the math and trig, statistical, engineering, date and time, lookup and reference, logical, and text function categories
The new Recommended Charts button lets you pick from a variety of charts that are right for your data

PowerPoint

Presenter View allows you to see your notes on your monitor while the audience only sees the slide
Smart Guides automatically appear when your objects are close to even, and tell you when objects are spaced evenly
Support for more multimedia formats, such as .mp4 and .mov, more high-definition content, and more built-in codecs

OneNote

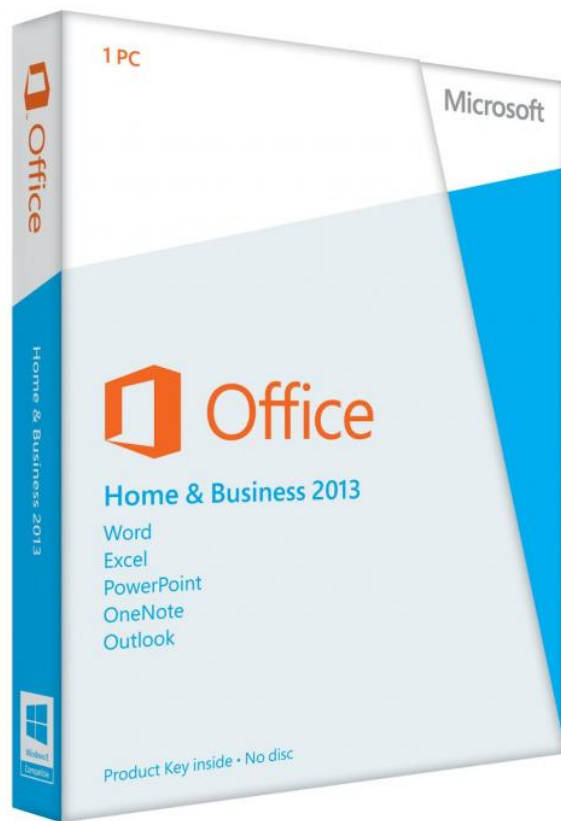

Smoothly draw, erase, and edit with your finger, stylus, or mouse on any touch-capable device
OneNote automatically converts your handwriting to text, so no worries about your handwriting
The new Send to OneNote tool makes it easier to include documents or Web pages in your notebooks

Outlook

The People Card collects key details about a contact all in one place
Add your local weather forecast right there in Calendar view, along with current conditions
Receive push-based email, appointments, and contacts from Outlook.com, (formerly Hotmail) - right in your Outlook experience

System Requirements:
